

All-in-one pre-fabricated 'DROP-IN' food & beverage kiosks

The **DROP-IN-SHOP** concept was developed by Stangard Foodservice Equipment Specialists Ltd. working closely with Five Star Fabrication Ltd. to provide a turnkey solution to a client need for a coffee shop / patisserie outlet concept which was required quickly, provided as a complete pre-fabricated, pre-wired & pre-plumbed operation that could be simply 'dropped-in' to a clear site with a single electrical, water and drain connection.

The s/steel construction of the **DROP-IN-SHOP** means the unit can be comfortably dismantled and moved, should the trading situation change. The longevity of the s/steel fabrication and re-usability has a residual value, where fixed shopfitting can seldom be re-used or conveniently re-sited. The **DROP-IN-SHOP** team can also provide a complete builders work package and can assist with all aspects of food service consultancy.

Typical availability within 3-4 weeks.
